

Diwali Sales

Diwali Sales

This is the overall summary of the project and the graphs that client asked for. It highlighted:

- ➔ Revenue
- ➔ Marital Status
- ➔ Top Sold Product
- ➔ Total Orders
- ➔ Top Sold Region
- ➔ Gender based Revenue
- ➔ Sum of Amount by state
- ➔ Revenue Based on Age Group
- ➔ Category Based Revenue
- ➔ Revenue based on Zone

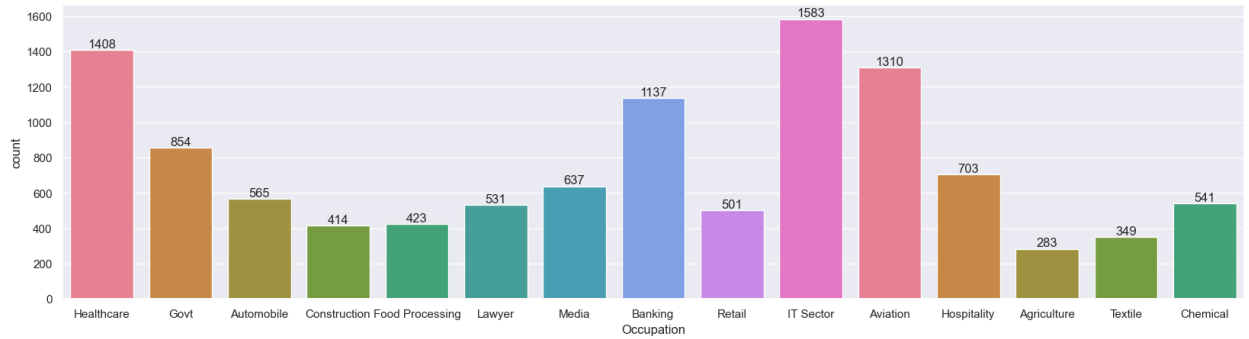

Observation:

- ➔ Female customer is more than male.
- ➔ Age 26-35 or young generation are more likely to buy online
- ➔ Least is age 0-17.

Steps can be taken to improve sales:

- ➔ Include more female based product for age range of 26-36.
- ➔ Reduce the item for children to save space and reduce loss form those products.
- ➔ Use more matching products thus revenue will generate from Married customers.

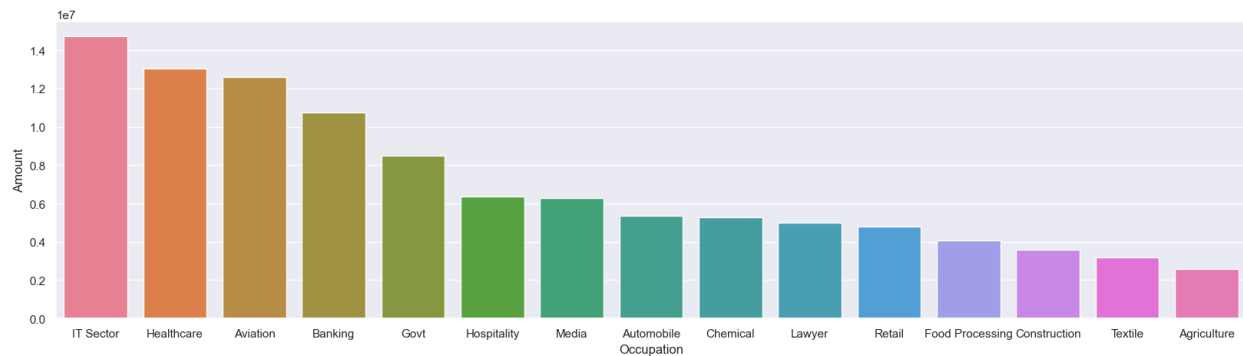

Observation:

- ➔ More customer are from IT sectors, Healthcare, Aviation, Banking sectors
- ➔ Fewer customers are from construction, Retailer, Agriculture, Textile occupation.

Suggested Actions:

- ➔ Include more accessories related to IT sectors, Healthcare, Aviation, Banking sectors.
- ➔ Give free delivery for low income people like Agriculture or Textile labors.
- ➔ Introduce the system of on demand purchase where take order for a week and then oversees or buy that product in bulk and sell to customers.

This is the amount of revenue from each sector.
